

Click on a linked mbox name to view the response from the mbox servers.

There are 3 options for response types:

1) No content returned, default content on the page is then displayed.

-This response occurs when:

-the mbox is not a display mbox in any campaign this visitor qualifies for.

-the mbox is in an active recommendation, but there is no recommendations content to display

2) Campaign default content is returned.
